

Lily Side Table

1 x Table Top	1 x Stem	1 x Table Base
		
6 x Bolts	1 x Allen Key	
		

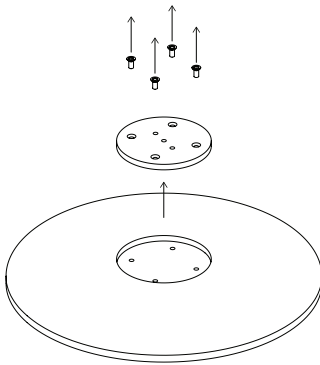

The Lily Side Table is delivered flat-packed and requires setup. Please follow the instructions closely to ensure a smooth and straightforward assembly.

Step 1

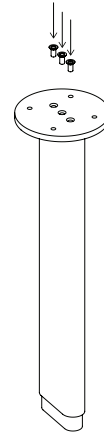

Unscrew and remove the metal connection plate from the table top.

Set bolts aside for step 3.

Step 2

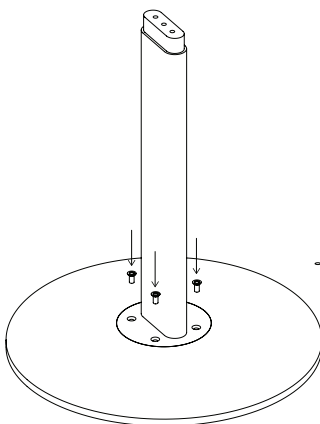

Attach the connection plate to the stem using three bolts. The plate must be connected to the flat end of the stem, do not attach it to the notched end.

Step 3

Attach the stem and connection plate back to the table top using the bolts from step 1.

For the best visual result, ensure the wood grain of the table top aligns with the table base.

Step 4

Position the table base onto the stem and fasten it using the remaining three bolts.

Ensure all bolts are firmly tightened, then flip the table once complete.
